Opportunities for water on this ride exist in Hillsboro and Droop Mt. State Park, though the fountains in the Park will be shut off in cooler weather.

This is a challenging ride that rewards cyclist with great vistas and wonderful pastoral scenes. It is one of those rides you like to do in Spring, Summer and Fall to enjoy the seasonal

changes.

There are several bailout and cut off points along the route. Persons wanting a climbing challenge but not all the miles can start in Hillsboro and just do the 25 mile loop portion of the ride.

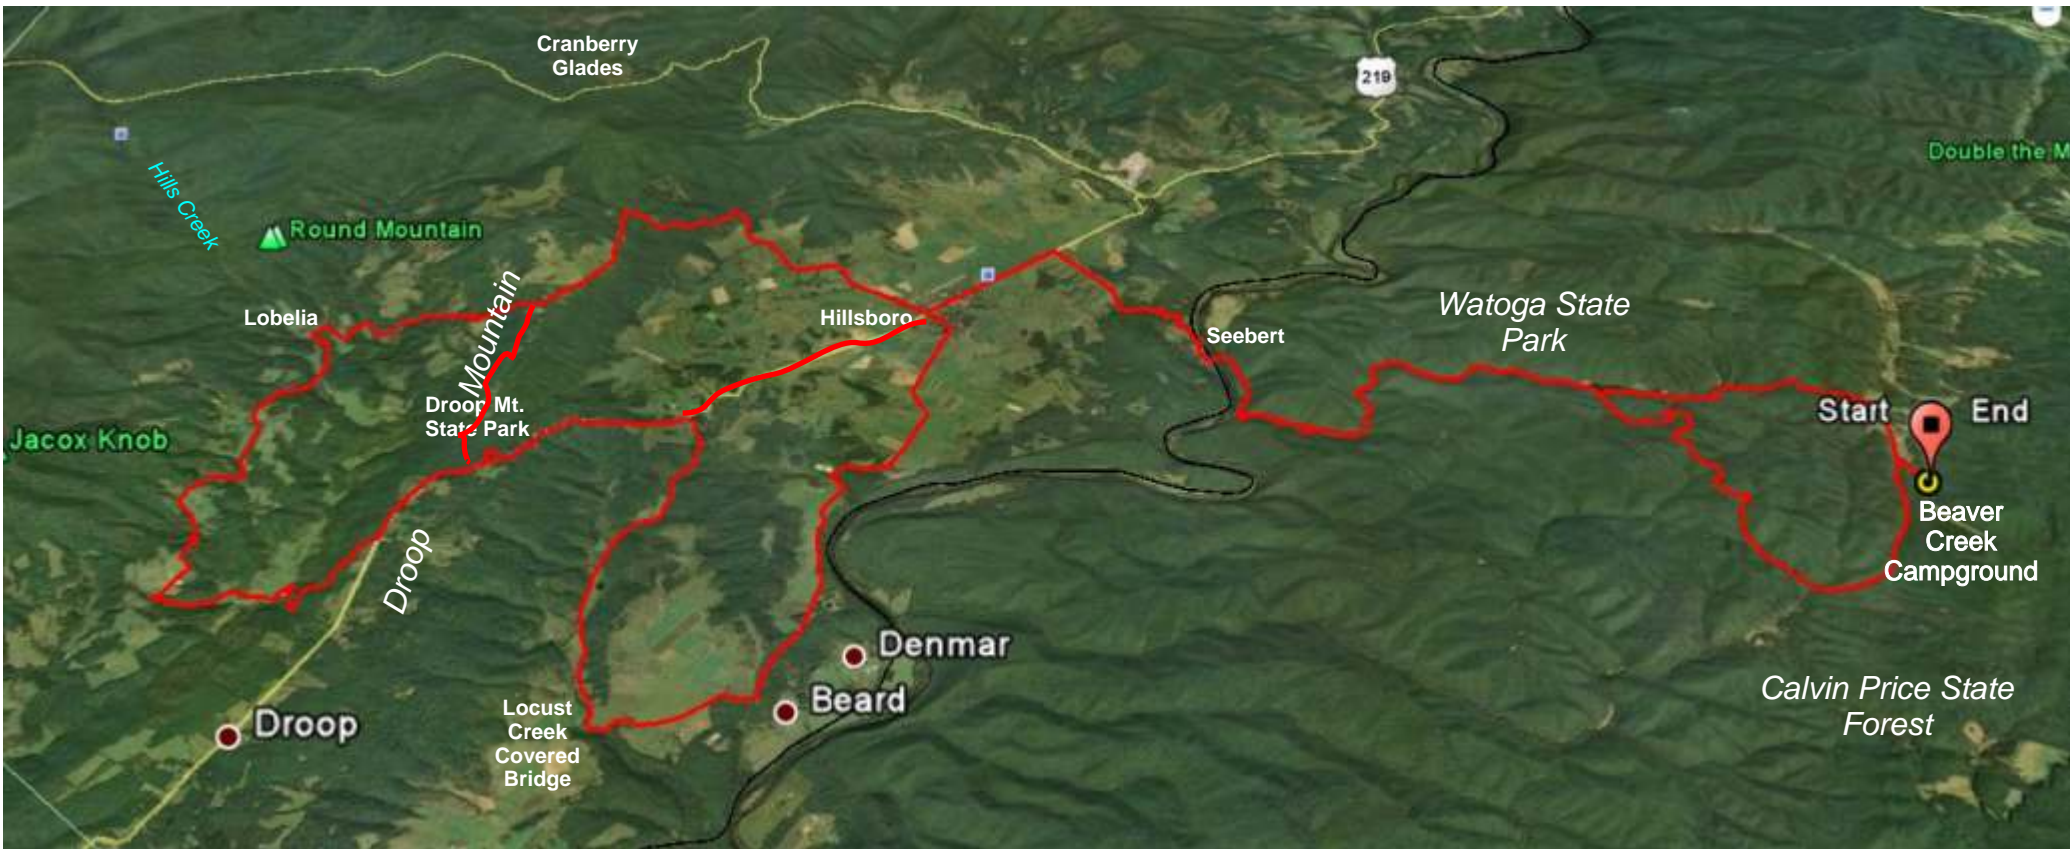

At Caesars Mt., Cty. 22 cuts across to 219 after passing thru Dr. Mt. State Park. This shortcut eliminate 5 short climbs and one long climb up Droop Mt.

Persons can go back to Hillsboro on 219 from Droop Mt, cutting off the Locust Creek portion of the ride.

When you get to the Locust Creek Covered Bridge at the intersection of Cty. 31 you could continue on 31, rather than taking the immediate left on 31/9. This will take you down by the Greenbrier river and by the Denmark Correctional Center*. This adds 0.6 miles and an additional short climb to the route.

Unfortunately, taking any shortcut eliminates some beautiful scenery. The best thing to do is take your time and enjoy the ride.

* The correctional center was originally opened in 1938 as the Denmark Sanitarium, for black TB patients. In 1957 it was desegregated and turned into a long term care facility with the TB patients transferred to Pinecrest Hospital in Beckley. It closed in 1990 and was converted into a prison in 1993.
